CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both

authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts*

where the initial volume covered the period 1966-68. The table below shows the prices and periods for the two types of cumulative index

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database. Information is dispatched weekly on 150 mm x 100 mm (6" x 4") cards.

TOPICS

This is an SDI service based on standard profiles. There are over 90 subjects covering

high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their

own internal information and current-awareness services.

JAPAN UPDATE

Six high-technology subjects are covered by Japan Update Services. Abstracts are provided for articles selected from about 300 Japanese journals and despatched weekly on conveniently-sized cards. This inexpensive service is designed to help engineers stay abreast of technological developments reported in the Japanese literature.

PROPERTIES OF Gallium Arsenide

This publication, the second in the EMIS Datareviews series, will be an invaluable work of reference for all those engaged in research and development involving gallium arsenide. Leading experts from the USA, Germany, Japan and Great Britain have co-operated in collating and evaluating the latest data on the physical properties of this increasingly important material.

Contents include:

- Physical & Thermal Properties
- Carrier Concentrations and Ionization rates
- Energy Gap
- Electro-optic Properties
- Photoconductivity
- Defects & IR imaging of defects
- Surface structure & oxidation
- Interfaces and contacts
- Resistivity
- Electron & hole mobility
- Optical functions
- Infra-red absorption
- Photoluminescence
- Diffusion of impurities
- Etching rates

Properties of Gallium Arsenide casebound 280 x 210 mm is priced at £85 UK, \$195 USA and £110 elsewhere.
